

At the Doerr

GAME NIGHT

Our next Game Night is Friday, April 12, 2019 from 3:10PM to 5:00PM in the Doerr Library. During Lent, we will replace our popular hot dog meal with a grilled cheese meal. Take a short break from your studies and join us. We have tons of board games, but feel free to bring your own. All are welcome!

ON DISPLAY

Come on in and check out our January displays. In the window, we are featuring books on immigration and the immigrants' experience in the U.S. On the leaning bookshelves, we have books on football in honor of the first Super Bowl played in January of 1967. Green Bay won! Finally, we have some wonderful historical fiction books displayed in the Fiction area. Sounds like it is time for a good book.

BOOK CLUB

Our student book club will meet on Thursday, February 14th, from 8AM to 8:45AM in the library's conference room. At our February 14th meeting, we will discuss Bill Bryson's *A Walk In the Woods*. Copies of the book are available at the library's information desk. Plan to join us for a great discussion and a delicious breakfast.

Ignite Our Hearts: Care for Our Common Home

Pope Francis' encyclical [Laudato Si'](#) charges all of us to do our part to live in harmony with one another and our world. Below, find a few of the major themes found in this encyclical. For more information about the encyclical, go to the [bulletin insert](#) available on the USCCB website.

- **Care for God's Creation.** God created the world and entrusted it to us as a gift. Now we have the responsibility to care for and protect it and all people, who are part of creation.
- **We are All Connected.** We are connected to the rest of the human family, to the created world, and to those who will come after us in future generations.
- **Impact on the Poor.** People in poverty have contributed least to climate change, yet they are disproportionately impacted by it. As a result of excessive use of natural resource by wealthy nations, those who are poor experience pollution, lack of access to clean water, hunger, and more.
- **Technological and economic development** must serve human beings and enhance human dignity, instead of creating an economy of exclusion, so that all people have access to what is needed for authentic human development.
- **Supporting Life, Protecting Creation.** Concern for nature is incompatible with failure to protect vulnerable human beings, such as unborn children, people with disabilities, or victims of human trafficking.

<p><i>Climate Refugees: How Global Warming is Displacing Millions</i> <i>edited by the New York Times Editorial Staff. 363.738 NEWc</i></p> <p>In a world where temperatures fluctuate and extreme weather has become commonplace, several populations have already found themselves unable to survive in their homeland. Droughts, flooding, and crop failures have caused famine, while extreme weather events like hurricanes and tornadoes have destroyed homes and, at times, whole villages. The articles in this collection examine the phenomenon of climate refugees, including the reasons they must move, the impact it has on humans and the economy, and examining the politics and other factors that affect their arrival in new countries. ~Amazon</p>
